

LODESTAR FAULT LOCATOR FOR OVERHEAD LINES

QUESTIONNAIRE FOR PURCHASE ORDER

Dear customer, this form helps to avoid misunderstandings and accelerates the processing of your inquiry. Please, return this questionnaire by E-MAIL: office@a3.energy Thank you.

Company name:	Representative:	Country/State:
---------------	-----------------	----------------

Phone:	Mobile phone:	E-Mail:	Other:
--------	---------------	---------	--------

Characteristics of target facility

Operating voltage range:	Neutral grounding type:
--------------------------	-------------------------

Neutral grounding devices presence:	Number of circuits per line:
-------------------------------------	------------------------------

Pole type:	Crossarm type:
------------	----------------

Wires relative position: (mark distance between wires):

Wire characteristics:	Line operating current, A:
-----------------------	----------------------------

Fault current values range (A) in case

Phase to phase fault occurrence:	Phase to ground fault occurrence:
----------------------------------	-----------------------------------

My requirements for types of faults to register

Phase to phase faults	Yes	No	Phase to ground faults	Yes	No
-----------------------	-----	----	------------------------	-----	----

Identification a type of a fault	Yes	No	Identification of fault direction	Yes	No
----------------------------------	-----	----	-----------------------------------	-----	----

My requirements for control method and data transmission

Radio channel availability	Yes	No	GSM channel data link availability	Yes	No
----------------------------	-----	----	------------------------------------	-----	----

Radio channel, operating as self organizing network	Yes	No	Data transmission to dispatching desk	Yes	No
---	-----	----	---------------------------------------	-----	----

Others

Lodestar APP quantity	Delivery with mounting kit	Yes	No
-----------------------	----------------------------	-----	----

Delivery method: EXW CIP FCA DDP	Where did you know about our products? Internet K \ther sources
